

F2. Evidence Boundary

Publishable evidence gate: True | status counts: {'completed': 7}

258-row test split

scope-controlled split/model-comparison evidence

CER/WER + proxy risk metrics

selected-300 proxy outputs

input provenance and row-selection evidence

not final human-reviewed risk claim

selected-300 human-reviewed audit

paper-grade predictor and recovery evidence

30 rows / 90 model assessments

Release boundary

Tracked: aggregate run records, validation summaries, metric tables, figure SVGs, and paper-facing evidence matrices.

Local-only: raw audio, transcripts, selected IDs, hypotheses, reviewer sheets/notes, runtime logs, model weights.
