

F5. Model Lane State

Main benchmark, candidate-lane, and runtime-blocked evidence are kept separate.

**Main comparable
split**
6 completed 258-row
runs
Used for
split/model-comparison
context

**Locale-gated
candidates**
4 fixed 15-row
candidates
No promotion until
strict zh-TW gate
is clean

**Runtime-blocked
probes**
10 bounded probes
Qwen fetch/load
timeout and Gemma
runtime class block

Promotion rule
Do not move candidates to 258-row or selected-300 until strict Taiwan Traditional
Chinese locale evidence is clean or an isolated multimodal/audio runtime exists.
